The Campus

Situated on 72 acres of land, containing 28 buildings totaling 471,849 square feet, and bordered on three sides by water, UConn’s Avery Point location fits well with its marine and maritime mission. This mission includes fulfilling UConn’s responsibilities as a sea grant institution. Avery Point contributes to the understanding – and solution – of problems relating to the intersection of oceans and people, both through the expertise of the faculty and the education of its students who will help ensure sustainable uses of marine resources and coastal regions and cities.

From the Mission Statement of the CT Department of Higher Ed Role & Scope, “The Avery Point campus will place special emphasis on marine and maritime-oriented undergraduate and graduate curricula, as well as programs responsive to the needs of its significant corporate and industrial constituencies, and its unique regional economic and cultural characteristics.” Five core areas to fulfilling this role and scope are:

- Liberal Arts Undergraduate Programming
- Marine and Maritime Undergraduate Programs
- Graduate and Professional Programs
- Research Activities
- Community Outreach Activities
